

Acceptance and refusal of donations

It is our policy to:

1. Assess donations to the charity.

The assessment will be based on the following questions, answered using information publicly available to us at the time:

- Will the donation help us to achieve our charitable objects and stated aims and priorities?
 - Does the donation come from a source which could bring the charity into disrepute?
 - Does the donation place conditions on the charity? and to what extent they are in the charities best interests.
2. Undertake due diligence on individuals and organisations that give money to us.
 - The level of due diligence will be scalable in accordance with the size of donation.

Final acceptance/refusal of donations will be at the Trustees' discretion
